

3Q**2007****Vanguard Long-Term Investment Grade Bond Fund (22)****FUND OBJECTIVE**

The investment seeks to provide a high and sustainable level of current income. The fund invests in a variety of high-quality and, to a lesser extent, medium-quality fixed income securities, at least 80% of which will be intermediate- and long-term investment-grade securities. The average weighted maturity generally ranges from 15 to 25 years.

INVESTMENT MANAGEMENT

Adviser: Wellington Management Company, LLP

Wellington Management Company, LLP, was founded in 1928 as an independent private partnership. The company's goal is to achieve superior investment results for every client.

RETURNS

as of 09/30/07

	Standard Average Annual Return Assuming account maintenance fees and/or withdrawal charges	Non-Standard Average Annual Return Not assuming account maintenance fees and withdrawal charges
YTD	(4.37)%	0.16%
1-Year	(3.26)%	1.32%
2-Year	(1.04)%	1.30%
3-Year	1.23%	2.83%
5-Year	3.07%	3.98%
10-Year or Since Inclusion ¹	5.38%	-
Inclusion Date ¹	07/01/96	-
10-Year or Since Inception ²	5.38%	5.43%
Inception Date ²	07/09/73	07/09/73

¹The inclusion data found in this chart are based upon the date the funds were included in the Separate Account.

²The inception data are based upon the inception date of the underlying fund.

Performance data quoted represent past performance. Current performance may be higher or lower than the performance stated due to recent volatility. Past performance does not guarantee future results. For performance current to the most recent month-end, please visit www.aigvalic.com. The investment return and principal value of an investment will fluctuate so that an investor's units, when withdrawn, may be worth more or less than the original cost.

Must be preceded or accompanied by a Portfolio Director Fixed and Variable Annuity prospectus.

Vanguard Long-Term Investment Grade Bond Fund (22)

DISCLOSURES

The data in Column 1 are based upon the date the fund was included in the Separate Account. Returns for periods prior to the date the funds became available in the Separate Account are hypothetical and are derived from the performance of the underlying fund, adjusted to reflect fees, expenses, and surrender charges if applicable, of Portfolio Director as if the fund had been in the Separate Account during the stated period. If applicable, returns reflect deduction of all fees and charges, including surrender charges (a maximum of 5%) and account maintenance fees, but not premium taxes or IncomeLock fees. Partial or full surrenders may be subject to a charge of the lesser of either 5% of the sum of the contributions received during the prior 60 months or 5% of the amount withdrawn. A Separate Account charge is deducted from all variable investment options. The charge is calculated each day and is based on the average daily net asset value of each option at the Separate Account level. The charge is annualized at 0.35% to 1.25%, depending on the variable option and contract. There may be a quarterly account maintenance fee of only \$3.75 for investments in the variable options, depending on the contract. There are no account maintenance fees for investments in the fixed options.

Returns in Column 2 reflect overall change in accumulation unit value from the beginning to the end of the periods shown, after deduction of fund expenses. Figures do not reflect deduction of account maintenance fees, surrender charges, IncomeLock fees or premium taxes. Returns for periods prior to the date the funds became available in the Separate Account are hypothetical and are calculated as if the fund had been in the Separate account during the stated period.

For funds with less than a full year of performance, the returns are cumulative.

Taxes on contributions to your VALIC Portfolio Director annuity contract can be deferred, subject to applicable contribution limits and related rules. That tax deferral is a result of issuing the contract, which satisfies specific important tax law requirements, including plan requirements, under your employer's retirement plan. It does not result from the mere fact that the contract is an annuity. Therefore, you do not receive additional tax-deferred treatment of earnings beyond the treatment provided by the tax-qualified retirement plan itself.

Standard and Poor's (S&P) 500 Index includes a representative sample of leading companies in leading industries that reflect the U.S. stock market.

Russell 2000 Index measures the performance of the 2,000 smallest companies in the Russell 3000 Index, which represents approximately 8% of the total market capitalization of the Russell 3000 Index.

Annuities are long-term investments. Income taxes are payable upon withdrawal. Federal withdrawal restrictions and tax penalties may apply to early withdrawals.

Annuity contracts typically include limitations, surrender charges, exclusions and expense charges.

Generally, higher potential returns involve greater risk and short-term volatility. For example:

- Small-cap, mid-cap, sector and emerging funds can experience significant price fluctuation due to business risks and adverse political developments.
- International (global) and foreign funds can experience price fluctuation due to changing market conditions, currency values, and economic and political climates.
- High-yield bond funds, which invest in bonds that have lower ratings, typically experience price fluctuation and a greater risk of loss of principal and income than when investing directly in U.S. government securities such as U.S. Treasury bonds and bills, which are guaranteed by the government for repayment of principal and interest if held to maturity.
- Mortgage-related funds' underlying mortgages are more likely to be prepaid during periods of declining interest rates, which could hurt the fund's share price or yield, and may be prepaid more slowly during periods of rapidly rising interest rates, which may lengthen the fund's expected maturity.
- Investors should carefully assess the risks associated with an investment in the fund. Fund shares are not insured and are not backed by the U.S. government, and their value and yield will vary with market conditions.

Largest Holdings and Top Sector Allocations illustrate composition as of the stated period and may not be representative of the fund's current or future investments.

Indexes have no identifiable objectives, are not managed funds and cannot be purchased. They do not provide an indicator of how individual investments performed in the past or how they will perform in the future. Performance of indexes does not reflect the deduction of any fees and charges, and past performance of indexes does not guarantee future performance of any investment. The Salomon Brothers High-Yield Index captures the performance of below investment-grade corporate bonds issued in the U.S.

AIG VALIC is a marketing name for the group of companies comprising VALIC Financial Advisors, Inc.; VALIC Retirement Services Company; and The Variable Annuity Life Insurance Company (VALIC); each of which is a member company of American International Group, Inc.
