**An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.**

Performance information is not included regarding fixed annuities.

The performance data quoted represents past performance. Current performance may be higher or lower than the performance stated due to recent market volatility. Past performance does not guarantee future results. Investment return and principal value will fluctuate so an investor's shares, when redeemed, may be worth more or less than their original cost. Please visit [www.valic.com](http://www.valic.com) for month-end performance.

Performance data prior to the inception date of the new class of funds is hypothetical and reflects the historical returns of an existing share class at net asset value adjusted to reflect the additional 12b-1 fees relating to the new class of funds.

Mutual funds are classified according to Morningstar. Several of these funds' returns were achieved during favorable market conditions. There can be no assurance that the funds will continue to achieve substantially similar performance as they previously experienced.

Generally, higher potential returns involve greater risk and short-term volatility. For example, small-cap, mid-cap, sector and emerging funds can experience significant price fluctuation due to business risks and adverse political developments. International (global) and foreign funds can experience price fluctuation due to changing market conditions, currency values, and economic and political climates. High-yield bond funds, which invest in bonds that have lower ratings, typically experience price fluctuation and a greater risk of loss of principal and income than when investing directly in U.S. government securities such as U.S. Treasury bonds and bills, which are guaranteed by the government for repayment of principal and interest if held to maturity. Investors should carefully assess the risks associated with an investment in the fund. Fund shares are not insured and are not backed by the U.S. government, and their value and yield will vary with market conditions.

Retirement accounts are intended to be long-term investments. Income taxes are payable upon withdrawal. Federal restrictions and a 10% tax penalty can apply to withdrawals prior to age 59½.

**To obtain prospectuses for the mutual funds in this program, visit [www.valic.com](http://www.valic.com) or call 1-800-428-2542. The prospectuses contain the investment objectives, risks, charges, expenses and other information about the investment companies that you should consider carefully before investing. Please read the prospectus carefully before investing or sending money.**
